About me

IT support and development specialist with 7+ years of experience managing toll and highway systems. I combine troubleshooting and database expertise with active Python automation, currently focusing on backend development and the implementation of modern AI models to make IT solutions more efficient.

Work experience

Senior IT Application Support & Maintenance Specialist

SkyToll, a. s. · 02/2021 – present

- Application ownership: end-to-end responsibility for assigned applications, their lifecycle, stability and development.
- Stakeholder management: regular customer status meetings, presenting technical solutions, outages and planned releases.
- Incident & crisis management: crisis communication during critical incidents, in-depth root-cause analyses.
- System administration in strict compliance with SLAs; proactive monitoring — configuring and extending Zabbix scenarios.
- Documentation and mentoring: technical manuals, workaround knowledge base, onboarding.

Junior IT Application Support Specialist

SkyToll, a. s. · 06/2019 – 01/2021

- L2 support and deep diagnostics of incidents via log analysis and monitoring tools.
- Database operations (Dfx): preparing and executing data-fix scripts (Oracle, PostgreSQL).
- Automation and reporting: streamlining team processes with custom solutions in Python and Django.

Manual Incident Identification Specialist

SkyToll, a. s. · 04/2018 – 05/2019

- Analysis and validation of toll-gate data from photographic records, correcting incomplete entries.

Skills

- Languages: Python, Perl, PL/SQL | Frameworks: FastAPI, Django, Flask
- Databases: Oracle Database, PostgreSQL, SQLite
- Cloud & CI/CD: Google Cloud Run, Docker, Linux, Git & GitHub
- Monitoring & tools: Zabbix, Grafana, Jira, HPSM | Full-stack: HTML, CSS, JS

Personal projects (selection)

- Lexinova — FastAPI + PostgreSQL + AI/LLM, CI/CD deployment to Google Cloud Run — github.com/Lipnicanmilos/lexinova
- Tracking Projects Pulse — Django reporting & monitoring automation (APScheduler, Oracle, JIRA, SharePoint)
- Job Scraper — Python job-posting scraper (BeautifulSoup, Selenium, AWS Lambda/DynamoDB)
- Reminder API — FastAPI REST API with JWT auth, SQLAlchemy, Alembic; pytest + GitHub Actions CI

Education

University of Žilina — Faculty of Operation and Economics of Transport (Ing.)

Road transport · 2016 – 2019 · Žilina

Technical Secondary School

Technical and Information Services (TIS) · 2006 – 2010 · Tvrdošín

Courses & certificates

- ITIL 4 Foundation — PeopleCert

- PL/SQL — Macrosoft s. r. o.
- Linux networking — Macrosoft s. r. o.

Languages

Slovak — native · English — B1 · German — B1

Ongoing education (2026)

- Containerization (Docker): dockerizing applications, unifying deployment processes within CI/CD.
- Technical growth: implementing LLM models and vector databases for AI applications; backend optimization.
- Language training: advancing English with a focus on professional IT terminology (individual lessons).
